[MONTH] [DAY], [YEAR]

Dear Graduate Admissions Committee,

I am writing to support [STUDENT]'s application to your [PROGRAM] at [INSTITUTION]. As a Postdoctoral Associate in computational biology with teaching and research responsibilities, I bring a current and comprehensive perspective on graduate training, education, and interdisciplinary research.

I met [STUDENT] in [SEMESTER] as a student in my computational biology course. This course covers advanced topics, including genomics, transcriptomics, protein structure prediction, molecular simulations, and computer-aided drug design—material that challenges even graduate students. During the course, [STUDENT] consistently engaged with the material presented. [STUDENT] attended office hours, demonstrating a willingness to seek assistance and deepen [STUDENT] understanding of new complex topics.

[STUDENT] took the initiative by participating in programming-based extra credit assignments such as analyzing bulk-RNA sequencing data to identify potential drug targets. These assignments required additional effort and a willingness to learn new computational skills, which [STUDENT] approached diligently. [STUDENT] collaboration with other students on these tasks contributed positively to the learning environment. While balancing a demanding course and extracurricular activities, [STUDENT] managed to maintain steady participation throughout the semester. [STUDENT] ability to handle multiple commitments reflects time management, solid skills, and dedication.

Based on my interactions with [STUDENT], [STUDENT] is determined to pursue further studies and could contribute to program, especially in areas that build upon [STUDENT] experiences.

With the highest regards,

[SIGNATURE]
